## Incision and Suturing Techniques for Everyday Clinical Success

**Friday, July 28, 2023**

8:30 AM - 4:30 PM

**University of Detroit Mercy School of Dentistry**

Course sign-in begins 15 minutes prior to the start of the course.

### Course Details

#### Course Description

This is a 1-day course specifically designed to address surgical incisions and suturing techniques for teeth and implants with use of Piezo surgery. Incision types, flap reflections and suturing techniques will be covered in detail through lectures and surgical videos to prepare the participants for everyday dental surgery. Clinical scenarios will be used to highlight Piezo surgery technology including minimally traumatic tooth and implant extraction and split ridge techniques. During the hands-on workshop, the participants will perform extraction and ridge preservation as well as various incisions and suturing techniques on pig jaws.

#### Course Objectives
