

Peri-Implant Diseases: Diagnosis, Treatment Solutions and Maintenance

COURSE DESCRIPTION

This is a one-hour presentation designed to highlight pathogenesis, classifications and treatment modalities for peri-implant diseases. The number of dental implants is on the rise with high success and survival rates. Similarly, peri-implant mucositis and peri-implantitis are becoming more prevalent in every-day practice. This presentation highlights methods used to diagnose and treat peri-implant disease to restore function and esthetics. Further, the importance of prevention and appropriate implant maintenance will equally be highlighted.

OBJECTIVES:

1. Understand pathogenesis and risk factors affecting dental implants.
2. Learn peri-implant disease classification.
3. Learn non-surgical treatment of peri-implant mucositis.
4. Be familiar with surgical techniques used to treat peri-implantitis.

IN PERSON- LECTURE

Wednesday: January 31, 2024 6:30PM-7:30PM
