

# Suturing Techniques for Everyday Clinical Success.

## COURSE DESCRIPTION

Surgical closure during dental surgery is key to predictable healing and haemostasis. This presentation focuses on applications of different suturing techniques for everyday dental surgery. A practical approach using evidence-based dentistry is used to select correct suturing material. Step by step suturing techniques will be shown using lectures and surgical videos to optimize wound closure. The participants will be able to recognize advantages and rationale for resorbable or non-resorbable sutures based on clinical scenarios.

## OBJECTIVES:

- Identify suturing instruments used for dental surgery.
- Learn how to perform different suturing methods.
- Be familiar with suturing materials and their indications.
- Recognize when to use resorbable versus non-resorbable sutures.

## IN PERSON- LECTURE

**Wednesday: June 12, 2024 6:30PM - 7:30PM**

**SPEAKER:** **Bassam M. Kinaia DDS, MS, DICOI** is the Associate Director of the Graduate Periodontology Program at the University of Detroit Mercy in Michigan.
