

Implant Site Bone Grafting Workshop: Updated Techniques & Piezo-Surgery.

COURSE DESCRIPTION

This course discusses ridge alterations post-extraction and provides a rationale for interceptive ridge preservation to minimize alveolar bone loss. During dental surgery, it is important to improve patient comfort and reduce post-operative pain and morbidity. Piezo surgery technology provides minimally traumatic tooth extraction and localized ridge augmentation techniques. The biologic basis for materials including bone grafts, membranes will be reviewed. Participants will learn techniques to preserve the original bone volume during tooth extractions, immediate implant placement with simultaneous guided bone regeneration for predictable outcomes.

Workshop Learning Objectives:

- Perform surgical incisions and flap reflection on pig jaws.
- Perform atraumatic extraction and ridge preservation.
- Use piezo tips to perform extractions on study models.
- Perform immediate implant with bone grafting and membrane placement.

**IN PERSON
LECTURE & HANDS-ON WORKSHOP**
Saturday: April 6, 2024 — 8:30AM - 5PM

SPEAKER:

Bassam M. Kinaia DDS, MS, DICOI is the Associate Director of the Graduate Periodontology Program at the University of Detroit Mercy in Michigan. He is also the former the Director of the Graduate Periodontology Program at the University of Detroit Mercy in Michigan as well as the Boston University Institute for Dental Research and Education at Boston university in Dubai. Dr. Kinaia is a Diplomate of the American Academy of Periodontology and the International Congress of Oral Implantology.

Dr. Kinaia currently serves as the Director of the Michigan Periodontal Association. He obtained his DDS degree from the University of Detroit Mercy School of Dentistry in Detroit, Michigan and later completed his Master of Science (MS) and Certificate of Advanced Graduate Studies (CAGS) in Periodontology at the University of Detroit Mercy School of Dentistry and St. John Hospital Health System in Michigan. Dr. Kinaia has numerous journal publications, chapter books and research in the fields of Periodontology and Dental Implants and received a certificate of Excellence from the American Academy of Periodontology in recognition of his teaching and research fellowship. He is a clinician with over 25 years of private practice experience and is an academician where he lectures nationally and internationally.
