

Minimizing Periodontal Risks for the Orthodontic Patient: Canine Exposure, Management of Gingival Recession & Gummy Smile.

COURSE DESCRIPTION

Orthodontic treatment is very meaningful in improving periodontal health status. However, patient related factors or the presence of plaque during orthodontic treatment can adversely affect the periodontium stability. This course is designed to help practitioners introduce interdisciplinary protocols needed to recognize periodontal risks during orthodontic treatment and understand how to manage these clinical challenges. Risks factors will be addressed by selecting appropriate treatment modalities at three time points: pre-, during and post-orthodontic therapy. These modalities include stabilization of periodontal disease, soft and hard tissue grafting, exposure of impacted teeth, and management of gummy smile including esthetic crown lengthening and lip repositioning. Clinical cases and surgical videos will be presented to explain step by step procedure to obtain optimal treatment outcomes.

OBJECTIVES:

- Identify periodontal risk factors for the orthodontist patient.
- Understand diagnosis and treatment planning for treating impacted canines.
- Differentiate whether an open or closed exposure procedure should be performed.
- Recognize periodontal phenotype and select appropriate treatment options.
- Understand gingival recession classifications and their impact on root coverage.
- Analyze the esthetic smile from an orthodontic and periodontal perspectives.

IN PERSON- LECTURE

Friday: Sept 20, 2024 / 9:00AM - 12:00PM

SPEAKER:

Bassam M. Kinaia DDS, MS, DICOI is the Associate Director of the Graduate Periodontology Program at the University of Detroit Mercy in Michigan. He is also the former the Director of the Graduate Periodontology Program at the University of Detroit Mercy in Michigan as well as the Boston University Institute for Dental Research and Education at Boston university in Dubai. Dr. Kinaia is a Diplomate of the American Academy of Periodontology and the International Congress of Oral Implantology.

Dr. Kinaia currently serves as the Director of the Michigan Periodontal Association. He obtained his DDS degree from the University of Detroit Mercy School of Dentistry in Detroit, Michigan and later completed his Master of Science (MS) and Certificate of Advanced Graduate Studies (CAGS) in Periodontology at the University of Detroit Mercy School of Dentistry and St. John Hospital Health System in Michigan. Dr. Kinaia has numerous journal publications, chapter books and research in the fields of Periodontology and Dental Implants and received a certificate of Excellence from the American Academy of Periodontology in recognition of his teaching and research fellowship. He is a clinician with over 25 years of private practice experience and is an academician where he lectures nationally and internationally.
