

A Hands-On Workshop for Single Implant Provisionalization and Placement.

COURSE DESCRIPTION

This is a one-day course specifically designed for dentists who are interested in learning how to place and restore dental implants. The course combines lectures, hands-on workshop, surgical videos and group discussion session. A practical approach using evidence-based dentistry will be applied to discuss surgical implant placement, impression techniques and provisionalization. Case scenarios will be presented from a combined restorative / surgical approach to improve treatment plan decision making and case selection. The hands-on workshop will include specifically designed study model for dental implant placement and impression techniques. A second study model will be provided to practice implant provisionalization technique.

OBJECTIVES:

- Understand the basic surgical procedures and flap designs related to dental implants.
- Understand importance of soft tissue development using implant provisionalization.
- Be familiar with restorative materials type and abutment designs.
- Decide indications to employ the immediate provisional concept.
- Understand the bio-mechanic of single tooth implant restoration.

Hands-on Surgical Workshop Learning Objectives

- Learn how to fabricate cement retained implant provisional.
- Understand steps for surgical implant placement.

IN PERSON - LECTURE & WORKSHOP

Friday: May 2, 2025 / 8:30AM - 4:30PM

OUR SPEAKERS:

Mo Koutrach, DDS, F.A.C.P is a board certified prosthodontist with over 25 years of experience in fixed, removable and implant dentistry. He is a diplomate of the American Board of Prosthodontics and American Academy of oral Implant Dentistry and a fellow of the American College of Prosthodontics. He received his DDS degree from University of Detroit Mercy School of Dentistry and completed his specialty certificate in Prosthodontics at the Indiana University School of Dentistry and his Maxillofacial Prosthodontics certificate from the University of Pittsburgh School of Dental Medicine.

Dr. Koutrach is a Clinical Associate Professor at University of Texas Health Center (UTH) School of Dentistry, and adjunct lecturer at University of Detroit Mercy School of Dentistry. Dr. Koutrach lectures nationally and internationally in the field of Prosthodontics and dental implantology and has written numerous publications on dental implants and Prosthodontics.

Bassam M. Kinaia DDS, MS, DICOI is the Associate Director of the Graduate Periodontology Program at the University of Detroit Mercy in Michigan. He is also the former Director of the Graduate Periodontology Program at the University of Detroit Mercy in Michigan as well as the Boston University Institute for Dental Research and Education at Boston university in Dubai. Dr. Kinaia is a Diplomate of the American Academy of Periodontology and the International Congress of Oral Implantology.

Dr. Kinaia obtained his DDS degree from the University of Detroit Mercy School of Dentistry in Detroit, Michigan and later completed his Master of Science (MS) and Certificate of Advanced Graduate Studies (CAGS) in Periodontology at the University of Detroit Mercy School of Dentistry and St. John Hospital Health System in Michigan. Dr. Kinaia has numerous journal publications, chapter books and research in the fields of Periodontology and Dental Implants and received a certificate of Excellence from the American Academy of Periodontology in recognition of his teaching and research fellowship. He is a clinician with over 24 years of private practice experience and is an academician where he lectures nationally and internationally.
