

A Implant Overdenture: Restorative, Surgical and Maintenance.

COURSE DESCRIPTION

Fully edentulous patients comprise an important sector of our implant patients. Correct diagnosis and treatment planning for full arch restorations with implant overdentures is important to enhance patients' quality of life. This is a comprehensive course specifically designed for dentists who are interested in learning how to place and restore implant supported complete overdentures. The course presentations centers surgically on the importance of cone-beam CT planning and implant placement, restoratively focuses on using the locator attachments. Clinical cases will be used to highlight the surgical and restorative procedures in detail. During the hands-on workshops the participants will perform implant placement for mandibular overdenture and practice direct attachment pick-up (chair side) for locator attachments using specifically designed study models.

OBJECTIVES:

- Understand indications and treatment planning for implant overdentures.
- Recognize the differences between 2 and 4 implants for overdenture treatment.
- View surgical steps for implant placement with correct parallelism.
- Understand the biomechanical principles and different occlusal schemes.
- Learn how to maintain periodontal health around implant overdenture.
- Perform direct attachment pick-up for locator attachment on specifically designed study models.

IN PERSON - LECTURE & WORKSHOP

Saturday: May 3, 2025 / 8:30AM - 4:30PM

OUR SPEAKERS:

Mo Koutrach, DDS, F.A.C.P is a board certified prosthodontist with over 25 years of experience in fixed, removable and implant dentistry.
