

Management of Gingival Recession: Diagnosis & Treatment Solutions.

COURSE DESCRIPTION:

Gingival recessions are not all the same, and require different approaches, depending on their characteristics. Soft tissue grafting procedures are highly predictable in correcting these mucogingival deficiencies around natural teeth. This presentation is specifically designed to highlight understanding of the diagnosis, etiology, and technique choice are required for the successful management in treating gingival recession. Clinical cases and surgical videos will be utilized to aid the clinician in evidence-based decision making for successful and predictable results.

OBJECTIVES:

- Understand the etiology of gingival recession.
- Learn how to make clinical decision based on the site's phenotype.
- Recognize gingival recession classification systems.
- Select what surgical techniques is appropriate based on gingival recession presentation.

IN PERSON — LECTURE: Wednesday
January 21, 2026 6:00pm-7:30pm
