Sedation Update for the Adult Patient

Oral and I.V. Moderate Sedation

COURSE DESCRIPTION

Dental anxiety can create an obstacle to patients seeking dental treatment. Oral and moderate intravenous conscious sedation can reduce such barrier. The purpose of this presentation is to review pharmacologic oral and moderate intravenous sedation for adult patients. The lecture highlights the updated national guidance and helps dentists translate it into patient selection, monitoring, documentation, recovery, discharge, and emergency-readiness decisions.For Michigan Licensed dentists you must receive your Moderate Sedation Permit (IV Sedation Course) in order to use oral sedation.

OBJECTIVES:

- Assess and manage patients prior to and during conscious sedation delivery.
- Understand concepts of various conscious sedation techniques.
- Gain a working knowledge of the pharmacology of conscious sedation.
- Properly choose / modify a technique most suitable to varying patient needs.
- Manage special patient populations
- Be familiar with a variety of armamentarium for sedation procedures.
- Properly monitor and record the events of a sedation procedure on.
- Comply with federal/state drug accountability regulations.
- Manage untoward events and medical emergencies.
