Think Pink, Think Esthetics! Soft Tissue Grafting to Improve Gingival Tissues around Implants.

COURSE DESCRIPTION:

Stable periodontal tissues are fundamental for long-term prognosis and patient satisfaction! This presentation focuses on management of gingival recession around implants. A periodontal perspective is used to discuss three different time points (*Pre, During and Post-implant placement*) to establish a healthy implant foundation. Clinical cases and surgical videos will be utilized to aid the clinician in evidence-based decision making for successful and predictable treatment outcomes.

OBJECTIVES:

- Identify peri-implant tissue deficiencies including gingival recession and alveolar ridge defects.
- Recognize correct restorative and surgical sequencing to build emergence profile.
- Understand timing for soft tissue augmentation around implants.
- Be familiar with various soft tissue grafting for dental implants.
