PAIN MANAGEMENT FOR THE DENTAL PATIENT.

COURSE DESCRIPTION

This is a three-hour presentation discussing pain control for the dental patient. Dental healthcare professionals need to understand the complexities of pain and pain medications. Effective pain management is an integral and important aspect of quality dental care. This course will discuss recommendations for effective pain management and highlight best practice guidelines for pain management in the dental patient.

OBJECTIVES:

- Discuss best practice guidelines for pain management in the dental patient.
- Develop an awareness of misconceptions and consequences of untreated pain.
- Recognize different types of pain and identify appropriate analgesics for each type.
- Discuss the pharmacology of analgesic medications.
- Describe opioids for pain management.
- Discuss CDC and ADA guidelines for opioid use in the dental patient.
